Subject Index

A

Absorption, insulin, pharmacokinetics of, Review, 188
Acidosis, epidemiology and treatment of diabetic ketoacidosis in community population, 528
Addiction, increased glycosylated proteins in opiate, Letter, 104
Adolescents, metabolic control in, by use of increased insulin dose, 460
β-Adrenergic blockade, after insulin-induced hypoglycemia, 155
Albuminuria, lipid abnormalities in insulin-dependent diabetes, 151
Allergies to human insulin, Letter, 402
Anti-insulin antibody titers, insulin requirements in early pregnancy, Brief Communication, 68
Anxiety, psychological and social correlates of glycemic control, 360
Autonomic neural dysfunction, in recently diagnosed diabetic subjects, 447

B

Bacterial contamination, traditional insulin-use practices, infection and, 121
Beta cell failure, pathophysiology of, after insulin-dependent diabetes mellitus remission, Case Report, 83
Bicarbonate therapy, lactic acidosis, and, Editorial, 99
—, lactic acidosis and, Letter, Reply 509, 510
Biguanide, metformin, and insulin receptors, 113*
—, and sulfonylureas, effects on insulin receptors, 54*
Biosynthetic NPH insulin, glucose clamp evaluation, 132
Birth defects, congenital, Mayo Clinic analysis of diabetic pregnancies, 539
Bismuth subsalicylate, diagnosis and treatment of reflux esophagitis, Letter, 404
Blood glucose, concentration, verbal skills in type I diabetes at different, 454
—, control, exercise and, in non-insulin-dependent diabetes, 416
—, diabetic complications and risk factors in Japanese population, 533
—, fasting levels, accuracy in estimation of, Brief Communication, 476
—, self-calibrating monitor, Brief Communication, 378
—, testing strips, Letter, 400
—, third trimester of normal pregnancies and, Brief Communication, 180
Blood glucose monitoring, Chemstrip bG testing and nurse performance, Letter, 398
—, values obtained with and without meter, Letter, 399
Blood glucose monitoring system, Letter, 610
Boluses, continuous basal insulin infusion, glycemic control without premeal boluses, 114
Brief Communications, 68, 180, 378, 476, 587

C

C-peptide insulin molar ratios, after oral glucose injection in hyperthyroid patients, 471
C-peptide levels, spontaneous ketonuria and, in obese type II diabetes, 442
Carbohydrate metabolism, pancreas transplantation and, Letter, 405
—, autonomic neural dysfunction in recently diagnosed diabetic subjects, 447
—, in African women with twin pregnancy, Brief Communication, 72
Carbohydrates, digestible, effect on glucose control in insulin-dependent diabetes mellitus, 354
—, glycemic effects of, Policy Statement, 607
—, high content diet with high fiber in children with type I diabetes mellitus, 63
Cardiac autonomic neuropathy, R-R intervals and, Letter 510

An asterisk * is used to indicate material that appeared in Supplement 1, Symposium on Effects of Oral Hypoglycemic Agents on Receptor and Postreceptor Actions of Insulin.

Cardiovascular fitness, physical activity program effects on metabolic control and, in children with insulin-dependent diabetes mellitus, 57
Case Reports, 83, 186, 381, 486
Cataract, formation, accelerated bilateral, in insulin-dependent diabetes mellitus, Case Report, 186
—, senile, and glucose intolerance, obesity and hypertension, Israel study, 52
Catheter colonization in pregnant diabetic patients using continuous subcutaneous insulin infusion pump, Brief Communication, 75
Cellular signaling, by insulin receptor, 8*
Chemstrip bG, self-monitoring and, Letter, 400
—, testing and nurse performance, Letter, 398
Children, blood protein glycosylation changes in diabetes summer camp, Brief Communication, 183
—, long-term benefits of self-monitoring, 322
—, recurrent use of disposable syringe-needle units in, 118
—, scleroderma-like changes in insulin-dependent diabetes mellitus, clinical and biochemical studies, 63
Chlorpropamide, correlation of serum lipids with diabetes control in treatment with, 575
Chlorpropamide alcohol flushing, Indian patients with non-insulin-dependent diabetes in the young, Letter, 404
Chlorpropamide and halofenate therapy, improved control of non-insulin-dependent diabetes mellitus, 19
Cholesterol, lipoprotein, plasma lipids and, in malnutrition, 579
Clinical Education Program, Editorial, 395
Combined halofenate and chlorpropamide therapy, improved control of non-insulin-dependent diabetes mellitus, 19
Continuous basal insulin infusion, glycemic control without premeal boluses, 114
Continuous subcutaneous insulin infusion, Review, 188
—, complications of, Letter, 397
—, diabetic ketoacidosis during long-term treatment, 1
—, low flow, use of vitamin B12, Letter, 397
—, metabolic alterations after a 2-hour nocturnal interruption of, 338
—, normalization of insulin sensitivity by physical training during, 520
—, postprandial exercise and insulin-dependent diabetes mellitus, 327
—, pump, needle, and catheter colonization in pregnant diabetic patients, Brief Communication, 75
—, skin temperature changes during, in diabetic neuropathy, Letter, 612
—, type I diabetic adolescent and, 107
—, versus multiple injections, effects on insulin-dependent diabetes mellitus and metabolic control of microangiopathy, 331

D

Dansylcadaverine, effects on receptor-mediated endocytosis, 35*
Dawn phenomenon in nondiabetes, fasting early morning rise in peripheral insulin, 32
Degradation, insulin, at injection site, Review, 188
Demographic characteristics, Memphis and Atlanta continuing care programs analyses of treatment methods, outcomes, and, 25
Depression, psychological and social correlates of glycemic control, 360
Diabetes Care in 1983, Editorial, 503
Diabetes control, outpatient monitoring and, Letter, 204
Diabetes, crises of, Letter, Reply 103
Diabetes Knowledge Scales, reliable knowledge assessment in diabetic patients, and, 36
Diabetes management, development of Diabetes Knowledge Scales, 36
Diabetes mellitus, clinical pattern in Ethiopians, 6
—, epidemiologic model for, 367
—, glycosylated hemoglobins, and glycosylated plasma proteins diagnosis of, 147
Diabetic ketoacidosis, long-term continuous subcutaneous insulin infusion treatment, 1
Diabetic lipohypertrophy, insulin absorption delays and, Brief Communication, 479
Diabetic triopathy, clinical pattern of diabetes mellitus in Ethiopians, and, 6
Diagnosis, screening tests for biethnic population, 347
—, urine anion gap, in patient with ketoacidosis, Case Report, 486
Diet, acute and long-term effects of exercise on glucose control in type I diabetes, 515
—, clinical strategy in non-insulin-dependent diabetes mellitus, 118*
—, continuous basal insulin infusion, glycemic control without premeal boluses, 114
—, effect of digestible carbohydrates on glucose control in insulin-dependent diabetes mellitus, 354
—, high-carbohydrate, high-fiber, in children with type I diabetes mellitus
—, metabolic and clinical risk factors and vascular complications of diabetes, Mexican study, 421, 428
—, non-insulin-dependent diabetes mellitus, initial response and sulfonylurea therapy, 59*
—, pectin and glycemic control in diabetes, 143
—, relationship between health locus of control, health value, and social support and compliance, 566
—, unmeasured, lean diabetic adults and, 557
Disposable syringe-needle units in diabetic children, recurrent use, 118
Disposable syringes, reuse of, Editorial, 200
DNA, insulin gene structure and function and, Review, 386

E

Editorials, 99, 200, 395, 396, 503, 602
Education, Diabetes Knowledge Scales, development of, 36
—, microcomputer program for patient and physician, Letter, 401
—, outpatient, third-party reimbursement, Policy Statement, 505

—, participation preference and health locus of control, 372
—, patient use of microcomputers, Letter, 105
Endocytosis, receptor-mediated, effects of dansylcadaverine on, 35*
Environment, diet, metabolic and clinical risk factors, Mexican study, 421, 428
Epidemiology, incidence, prevalence, and mortality in diabetes mellitus, 367
—, referral bias in diabetes research, and, 12
—, undernutrition in pathogenesis of diabetes mellitus, Review, 595
Esophagitis, reflux, bismuth subsalicylate and, Letter, 404
Ethiopia, clinical pattern of diabetes mellitus, 6
Exercise, acute and long-term effects on glucose control in type I diabetes, 515
—, clinical strategy in non-insulin-dependent diabetes mellitus, 118*
—, glucose tolerance after training in non-insulin-dependent diabetes mellitus, 434
—, normalization of insulin sensitivity by physical training during continuous subcutaneous insulin infusion, 520
—, patient management of diabetes, Letter, 609
—, postprandial, and continuous subcutaneous insulin infusion, in insulin-dependent diabetes mellitus, 327
—, relationship between health locus of control, health value, and social support and compliance, 566

F

Fasting blood glucose levels, accuracy in estimation of, Brief Communication, 476
Fasting glycemia, unmeasured diet in lean diabetic adults and, 557
Fat, sulfonylurea effects on insulin responsiveness in, 42*
Foot pressures, abnormal, reduction of in diabetic neuropathy using polymer insole material, 42

G

Gene structure of insulin, recombinant DNA methodology and, Review, 386
Glibenclamide, correlation of serum lipids with diabetes control in treatment with, 575
Glucoscan meter, self-monitoring of blood glucose and, Technical Section, 590
Glucose, effects of simple sugars on, in normal subjects, 309
—, protein ingestion effect on insulin response and, to oral glucose load, 465
—, screening tests for biethnic population, 347
—, self-monitoring of patients with abnormal color vision, 318
—, tactile self-monitoring in visually impaired patients, 313
Glucose balance, nonenzymatically glycosylated serum proteins as a control index of, 548
Glucose clamp evaluation of biosynthetic NPH insulin, 132
Glucose control, acute and long-term effects of exercise in type I diabetes, 515
—, effect of digestible carbohydrates in insulin-dependent diabetes mellitus, 354
—, normalization of insulin sensitivity by physical training during continuous subcutaneous insulin infusion, 520
—, psychological and social correlates, 360
Glucose intolerance, senile cataract and, obesity and hypertension, Israel study, 52
—, undernutrition in pathogenesis of diabetes mellitus, Review, 595
Glucose production, oral sulfonylurea agents and, in non-insulin-dependent diabetes mellitus, 72*
Glucose recovery, delayed, propranolol effect on, after insulin-induced hypoglycemia, 155
Glucose stimulation, of insulin secretion, pathophysiology in non-insulin-dependent diabetes mellitus, Review, 491
Glucose tolerance, exercise and, in non-insulin-dependent diabetes mellitus, 416
—, exercise training in non-insulin-dependent diabetes mellitus, 434
—, impaired, glycosylated hemoglobins, and glycosylated plasma proteins in diagnosis of, 147
—, mumps infection, 170
—, relaxation-induced improvement, Letter, 203
—, sulfonylurea treatment and insulin resistance in type II diabetes, 81*
Glucosylated hemoglobin, Report of the Expert Committee on Glucosylated Hemoglobin, Editorial, 602
Glyburide, effect on insulin binding in insulin-dependent diabetes mellitus, 106*
Glycemic control, blood protein changes in diabetes summer camp, Brief Communication, 183
—, dietary pectin and, in diabetes, 143
—, short-term, plasma B-thromboglobulin, platelet factor 4, fibrinopeptide A and, 174
Glycemic effects of carbohydrates, Policy Statement, 607
Glycosylated hemoglobins, and glycosylated plasma proteins in diagnosis of diabetes mellitus and impaired glucose tolerance, 147
—, nonenzymatically glycosylated serum proteins as a control index of glucose balance, 548
Glycosylated plasma proteins and glycosylated hemoglobins, in diagnosis of diabetes mellitus and impaired glucose tolerance, 147
Glycosylated proteins, increased, in opiate addicts, Letter, 104
Glycosylation, blood protein changes in diabetes summer camp, Brief Communication, 183

H

HDL cholesterol, normalization of insulin sensitivity by physical training during continuous subcutaneous insulin infusion, 520
Halofenate and chlorpropamide therapy, improved control of non-insulin-dependent diabetes mellitus, 19

Health locus of control, participation preference and, in diabetes education, 372
Hemostasis, short-term glycemic control in insulin-dependent diabetes mellitus, 174
Hepatic glucose production, oral sulfonylurea agents in non-insulin-dependent diabetes, 72*
Hepatic insulin resistance in non-insulin-dependent diabetes and sulfonylurea effects, 47*
High-carbohydrate, high-fiber diet in children with type I diabetes mellitus, 63
Human insulin, semisynthetic, biologic and immunologic activity in insulin-dependent diabetes, 128
Hydramnios, Mayo Clinic analysis of diabetic pregnancies, 539
β-Hydroxybutyrate, detection by in vitro oxidation with hydrogen peroxide, Brief Communication, 80
—, development of paper-strip test for, Technical Section, 481
Hypertension, and glucose intolerance and obesity, Israel study, 52
Hyperthyroid patients, C-peptide insulin molar ratios after oral glucose injection, 471
Hypoglycemia, locked-in syndrome following prolonged, Letter, 613
—, associated with trimethoprim-sulfamethoxazole therapy, Letter, 508
—, insulin-induced, propranolol effect on delayed glucose recovery, 155
—, management, relationship between health locus of control, health value, and social support and compliance, 566
Hypoglycemia in a diabetes nurse care coordinator, Case Report, 88
Hyponatremia and sulfonylureas, Letter, Reply, 201

I

Immunoglobulin G, impaired metabolic response to regular insulin and, Letter, 403
Infection, self-monitoring of blood glucose and, Letter 612
—, traditional insulin-use practices, bacterial contamination and, 121
Injection, insulin wastage in ambulant practice, 343
Insulin, administration of, relationship between health locus of control, health value, and social support and compliance, 566
—, biosynthetic NPH, kinetics and metabolic activity, glucose clamp evaluation, 132
—, continuous basal infusion, glycemic control without premeal boluses, 114
—, effects of simple sugars on, in normal subjects, 209
—, human, allergies to, Letter, 402
—, impaired metabolic response in presence of circulating insulin-binding immunoglobulin G, Letter, 403
—, increased dose, improved metabolic control in adolescents, 460
—, peripheral, fasting early morning rise, dawn phenomenon in nondiabetes, 32
—, semisynthetic human, biologic and immunologic activity in insulin-dependent diabetes, 128
—, third trimester of normal pregnancies and, Brief Communication, 180
—, wastage in ambulant practice, 343
Insulin-dependent diabetes, autonomic neural dysfunction in recently diagnosed diabetic subjects, 447
—, lipid abnormalities and albuminuria, 151
—, referral bias in diabetes, 12
—, semisynthetic human insulin, biologic and immunologic activity in, 128
—, vascular reactivity to ischemia in microangiopathy, 47
Insulin-dependent diabetes mellitus, continuous subcutaneous insulin infusion and postprandial exercise, 327
—, continuous subcutaneous insulin infusion versus multiple injections, effects on, and metabolic control of microangiopathy, 331
—, accelerated bilateral cataract formation in, Case Report, 186
—, children, and, physical activity program effects on metabolic control and cardiovascular fitness, 57
—, effect of digestible carbohydrates on glucose control, 354
—, effects of 2-hour nocturnal interruption of continuous subcutaneous insulin infusion on metabolism, 338
—, glyburide effects on metabolic control and insulin binding, 106*
—, maternal age and, Letter, 103
—, mumps infection and, 170
—, psychological and social correlates of glycemic control, 360
—, remission, pathophysiology of beta cell failure, Case Report, 83
—, scleroderma-like changes, clinical and biochemical studies, 163
—, self-monitoring with impaired color vision, 318
—, short-term hemostasis and, 174
Insulin absorption delays, diabetic lipohypertrophy and, Brief Communication, 479
Insulin binding, glyburide effects in insulin-dependent diabetes mellitus, 106*
—, improved, sulfonylureas and, in non-insulin-dependent diabetes, 100*
Insulin gene structure and function, using recombinant DNA methodology, Review, 386
Insulin pharmacokinetics, Review, 188
Insulin receptor, cellular signaling by, 8*
—, effects of biguanides and sulfonylureas in cultured cells, 54*
—, metformin and, 113*
Insulin requirements in early pregnancy, anti-insulin antibody titers and, Brief Communication, 68
Insulin resistance, sulfonylurea treatment and, in type II diabetes, 81*
Insulin response, protein ingestion effect on glucose and, to oral glucose load, 465
Insulin secretion, after exercise training in non-insulin-dependent diabetes, 434

—, exercise and, in non-insulin-dependent diabetes, 416
—, non-insulin-dependent diabetes clinical strategy, 118*
—, pathophysiology in non-insulin-dependent diabetes, Review, 491
—, sulfonylurea effects on pancreatic islet function in man, 25*
—, sulfonylurea and non-insulin-dependent diabetes, 89*
—, and action, in non-insulin-dependent diabetes mellitus, 17*
Insulin sensitivity, normalization by physical training during continuous subcutaneous insulin infusion, 520
Insulin therapy, in type I diabetic adolescent, 107
Insulin timing, pharmacokinetics and, Review, 188
Ischemia, delayed vascular reactivity to, in diabetic microangiopathy, 47
Islet beta cell function, non-insulin-dependent diabetes clinical strategy, 118*

J

Japanese study, diabetic complications and risk factors in, 533

K

Ketoacidosis, B-hydroxybutyrate detection by in vitro oxidation with hydrogen peroxide, Brief Communication, 80
—, diabetic, epidemiology and treatment in a community population, 528
—, long-term treatment, continuous subcutaneous insulin infusion and, 1
—, recurrent, in acquired total lipodystrophy, Case Report, 381
—, urine anion gap in diagnosis, Case Report, 486
Ketonuria, spontaneous, and serum C-peptide levels in obese type II diabetes, 442

L

Lactic acidosis, bicarbonate therapy and, Letter, Reply, 509, 510
—, high-dose or low-dose bicarbonate therapy, Editorial, 99
Letters to the Editor, 103, 201, 397, 507, 609
Lipid abnormalities in insulin-dependent diabetes patients with albuminuria, 151
Lipids, serum, correlation with diabetes control in sulfonylurea-treated diabetes, 575
Lipodystrophy, acquired, recurrent ketoacidosis in, Case Report, 381
Lipoprotein, effects of simple sugars on, in normal subjects, 309
Lipoprotein cholesterol, plasma lipids and, in malnutrition, 579
Liver, sulfonylurea effects on insulin responsiveness in, 42*
Loading gauge safety, Letter, 507
Long-term studies, Memphis and Atlanta continuing care programs, analysis of demographic characteristics, treatment methods, and outcomes, 25

M

Mayo Clinic, analysis of diabetic pregnancies, 1950–1979, 539
Metabolism, carbohydrate, in African women with twin pregnancy, Brief Communication, 72
—, changes in, after a 2-hour nocturnal interruption of continuous subcutaneous insulin infusion, 338
—, control in diabetic adolescents by use of increased insulin dose, 460
—, diet and clinical risk factors and vascular complications of diabetes, Mexican study, 421, 428
—, effects in non-insulin-dependent diabetes mellitus, 17*
—, effects on microangiopathy of continuous subcutaneous insulin infusion and multiple injections in insulin-dependent diabetes mellitus, 331
—, glyburide effects on, and insulin binding in insulin-dependent diabetes mellitus, 106*
—, non-insulin-dependent diabetes clinical strategy, 118*
—, of biosynthetic NPH insulin, kinetics and metabolic activity, glucose clamp evaluation, 132
—, physical activity program effects on control and cardiovascular fitness in children with insulin-dependent diabetes mellitus, 57
Metformin and insulin receptors, 113*
Microangiopathy, delayed vascular reactivity to ischemia, 47
—, metabolic control of, effects of continuous subcutaneous insulin infusion versus multiple injections in insulin-dependent diabetes mellitus, 331
Microcomputers, diabetes data management program for, Letter, 401
—, use in patient education, Letter, 105
Micronesia, non-insulin-dependent diabetes in Republic of Kiribati, 409
Morphine, opioid peptides, and pancreatic islet function, Review, 92
Mortality, epidemiologic model for diabetes mellitus, 367
—, perinatal, Mayo Clinic analysis of diabetic pregnancies, 539
Mumps infection and insulin-dependent diabetes mellitus, 170

N

NPH insulin, biosynthetic, kinetics and metabolic activity, glucose clamp evaluation, 132
National Diabetes Data Group criteria, screening tests for biethnic population, 347*
National Diabetes Data Group, Report of the Expert Committee on Glucosylated Hemoglobin, Editorial, 602
Nephropathy, non-insulin-dependent diabetes in the young, Indian study, Brief Communication, 587

Nesidioblastosis, adult diagnosis, and hypoglycemia in diabetes nurse care coordinator, Case Report, 88
Neural dysfunction, autonomic, in recently diagnosed diabetic subjects, 447
Neuropathy, diabetic, reduction of abnormal foot pressures using polymer insole material, 42
—, skin temperature changes during continuous subcutaneous insulin infusion in, Letter, 612
Non-insulin-dependent diabetes, diet (10-year study) and sulfonylurea therapy, 59*
—, autonomic neural dysfunction in recently diagnosed diabetic subjects, 447
—, chlorpropamide alcohol flushing and, Letter, 404
—, clinical strategy, 118*
—, diabetic complications and risk factors in Japanese population, 533
—, exercise effects on blood glucose control, glucose tolerance, insulin secretion and action, 416
—, glucose balance and, nonenzymatically glycosylated serum proteins as a control index of, 548
—, glucose tolerance after exercise training, 434
—, hepatic insulin resistance and sulfonylurea effects in potentiating, insulin action, 47*
—, improved insulin binding and action with sulfonylurea, 100*
—, oral sulfonylurea agents and hepatic glucose production, 72*
—, Pacific area study of Republic of Kiribati, 409
—, pathophysiology of insulin secretion, Review, 491
—, sulfonylurea and insulin secretion, 89*
Non-insulin-dependent diabetes in the young, nephropathy in, Indian study, Brief Communication, 587
—, obesity and insulin secretion in Indian patients, Brief Communication, 77
Non-insulin-dependent diabetes mellitus, improved control of, by combined halofenate and chlorpropamide therapy, 19
—, insulin secretion and insulin action in, 17*
Nonenzymatically glycosylated serum proteins, control index of glucose balance, 548
Nutrition, clinical pattern of diabetes mellitus in Ethiopians, and, 6
Nutrition, counseling, third-party reimbursement, Policy Statement, 505
Nutrition, plasma lipids and lipoprotein cholesterol in malnutrition, 579
Nutrition, undernutrition in pathogenesis of diabetes mellitus, Review, 595

O

Obesity, GI, and hypertension, Israel study, 52
—, insulin secretion in Indian patients with non-insulin-dependent diabetes in the young, Brief Communication, 77
—, non-insulin-dependent diabetes study of Republic of Kiribati, 409
—, spontaneous ketonuria and serum C-peptide in type II diabetes, 442
—, undernutrition in pathogenesis of diabetes mellitus, Review, 595
—, unmeasured diet in lean diabetic adults, 557
Opioid peptides, morphine, and pancreatic islet function, Review, 92
Oral glucose, C-peptide insulin molar ratios after injection in hyperthyroid patients, 471
—, protein ingestion effect on glucose and insulin response to, 465
Oral hypoglycemic agents, acute and chronic effects of sulfonylureas on pancreatic islet function in man, 25*
—, biguanides and sulfonylureas, effects on insulin receptors, 54*
—, cellular loci of sulfonylurea actions, 67*
—, cellular signaling by insulin receptor, 8*
—, dansylcadaverine, effects on receptor-mediated endocytosis, 35*
—, hepatic insulin resistance in non-insulin-dependent diabetes, 47*
—, insulin secretion and action in non-insulin-dependent diabetes mellitus, 17*
—, metformin and insulin receptors, 113*
—, non-insulin-dependent diabetes, relation to diet and subsequent sulfonylurea therapy, 59*
—, recent developments on mechanism of action of, 1*
—, sulfonylurea, improved insulin binding and action in non-insulin-dependent diabetes, 100*
—, sulfonylurea agents and hepatic glucose production in non-insulin-dependent diabetes, 72*
—, sulfonylurea and insulin resistance and secretion, 89*
—, sulfonylurea treatment and insulin resistance in type II diabetes, 81*
—, sulfonylureas, background and development, 3*
Organization section, xxii, xxviii, xxx, xxxii, XXX
Oxidation, in vitro, B-hydroxybutyrate detection with hydrogen peroxide, Brief Communication, 80

P

Pancreas, carbohydrate metabolism after transplantation of, Letter, 405
—, cellular loci of sulfonylurea actions, 67*
—, insulin gene structure and recombinant DNA methodology, Review, 386
—, undernutrition in pathogenesis of diabetes mellitus, Review, 595
Pancreatic islet function, opioid peptides, and morphine, Review, 92
Pancreatic islet function in man, acute and chronic effects of sulfonylureas, 25*
Paper-strip test for 3-hydroxybutyrate, clinical application, Technical Section, 481
Pathophysiology, of insulin secretion in non-insulin-dependent diabetes, Review, 491

—, of beta cell failure after insulin-dependent diabetes mellitus remission, Case Report, 83
Patient classification, postprandial urine C-peptide measurement and, Letter, 202
—, education, insulin wastage in ambulant practice, 343
—, management of diabetes, Letter, 609
—, monitoring, outpatient, Letter, 204
—, screening for diabetes mellitus in biethnic population, 347
Pectin, dietary, and glycemic control in diabetes, 143
Peripheral insulin, fasting early morning rise, dawn phenomenon in nondiabetes, 32
Pharmacokinetics, Review, 188
Plasma cortisol, relaxation-induced improvement in glucose tolerance, Letter, 203
Plasma fibrinogen, short-term hemostasis in insulin-dependent diabetes mellitus, 174
Plasma lipids, lipoprotein cholesterol and, in malnutrition, 579
Policy Statement, 505, 607
Polymer insole material, reduction of abnormal foot pressures in diabetic neuropathy, 42
Postreceptor action of insulin, recent developments, 1*
Postreceptor sites, improved insulin action at, 89*
Pregnancy, diabetic, at Mayo Clinic 1950–1979, 539
—, early, anti-insulin antibody titers, insulin requirements and, Brief Communication, 68
—, needle and catheter colonization using continuous subcutaneous insulin infusion pump, Brief Communication, 75
—, third trimester of, periprandial blood glucose and insulin values, Brief Communication, 180
—, twin, carbohydrate metabolism in African women with, Brief Communication, 72
Propranolol effect on delayed glucose recovery after insulin-induced hypoglycemia, 155
Protein ingestion, effect on glucose and insulin response to oral glucose load, 465
Psychology, glycemic control and, 360
—, participation preference and health locus of control in diabetes education, 372
—, relationship between health locus of control, health value, and social support and compliance, 566

R

R-R interval studies, cardiac autonomic neuropathy and, Letter, 510
Receptor action of insulin, recent developments, 1*
Receptor-mediated endocytosis, effects of dansylcadaverine on, 35*
Recurrent use of disposable syringe-needle units in diabetic children, 118
Reflectance blood glucose monitor evaluation, Brief Communication, 378
Research, referral bias in diabetes, 12
Retinopathy, diabetic, complications and risk factors in Japanese population, 533
Retinopathy, non-insulin-dependent diabetes in the young, Indian study, Brief Communication, 587
Review, 92, 188, 386, 491, 595
Reviewers, xxvi
Rochester, Minnesota, referral bias in diabetes research, 12

S

Scleroderma-like changes in insulin-dependent diabetes mellitus, clinical and biochemical studies, 163
Self-calibrating blood glucose monitor evaluation, Brief Communication, 378
Self-monitoring, Glucoscan and Glucoscan II meters and, Technical Section, 590
—, children and, 318
—, patient management of diabetes, Letter, 609
—, patients with impaired color vision and, 318
—, psychological and social correlates of glycemic control, 360
—, relationship between health locus of control, health value, and social support and compliance, 566
Self-monitoring fasting blood glucose levels, accuracy in estimation of, Brief Communication, 476
Self-monitoring of blood glucose and infection, Letter, 612
Semisynthetic human insulin, biologic and immunologic activity in insulin-dependent diabetes, 128
Senile cataract and, GI, obesity and hypertension, Israel study, 52
Serum lipids, correlation with diabetes control in sulfonylurea-treated diabetes, 575
Serum triglyceride, diabetic complications and risk factors in Japanese population, 533
Skin, temperature changes during continuous subcutaneous insulin infusion in diabetic neuropathy, Letter, 612
Special announcement, National Standard for Diabetes Patient Education Programs, xxxi
Sulfonamides, background and development, 3*
Sulfonylurea, actions, cellular loci of, 67*
—, and insulin resistance in type II diabetes, 81*
—, correlation of serum lipids with diabetes control in treatment with, 575
—, hepatic insulin resistance in non-insulin-dependent diabetes, 47*
—, improved insulin binding and action in non-insulin-dependent diabetes, 100*
—, insulin resistance and insulin secretion in non-insulin-dependent diabetes, 89*
—, non-insulin-dependent diabetes, diet and, 59*
Sulfonylureas, acute and chronic effects on pancreatic islet function in man, 25*
—, and biguanides, effects on insulin receptors, 54*
—, background and development, 3*
—, clinical strategy in non-insulin-dependent diabetes, 118*
—, target tissues for insulin and, 42*

T

Technical Section, 481, 590
Teledyne Sleep Sentry, false security, Letter, 507
Third-party reimbursement for outpatient education and nutritional counseling, Policy Statement, 505
Tolbutamide, correlation of serum lipids with diabetes control in treatment with, 575
Triglycerides, lipoprotein cholesterol and plasma lipids, in malnutrition, 579
Trimethoprim-sulfamethoxazole therapy, hypoglycemia and, Letter, 508
Type I diabetes, acute and long-term effects of exercise on glucose control, 515
—, normalization of insulin sensitivity by physical training during pump therapy, 520
—, verbal skills and different blood glucose concentrations in, 454
—, mellitus, high-carbohydrate, high-fiber diet in children with, 63
—, mellitus, tactile self-monitoring in visually impaired patients, 313
Type I diabetic adolescent, controlled trial of intensified insulin therapy, 107
Type II diabetes, diet, metabolic and clinical risk factors with vascular complications, Mexican study, 421, 428
—, spontaneous ketonuria and serum C-peptide levels in obesity, 442
—, sulfonylurea and insulin resistance in, 81*
—, unmeasured diet in lean diabetic adults and, 557
Tyrosine phosphokinase activity, insulin-activatable, 8*

U

Ulceration, foot, reduction of abnormal foot pressures in diabetic neuropathy, 42
Urbanization, non-insulin-dependent diabetes study fo Republic of Kiribati, 409
Urine C-peptide measurement, postprandial, Letter, 202
Urine anion gap, patient with ketoacidosis and, Case Report, 486

V

Vascular complications, diet, metabolic and clinical risk factors, Mexican study, 421, 428
Vascular reactivity, delayed, to ischemia in diabetic microangiopathy, 47
Verbal skills, type I diabetes, different blood glucose concentrations and, 454
Vision, self-monitoring in visually impaired patients, 313
—, self-monitoring of patients with abnormal color vision, 318
Visually impaired patient self-monitoring, tactile techniques, 313
Vitamin B12 use in low flow in continuous subcutaneous insulin infusion, Letter, 397
